

Demonstrating the value of new technologies

Mazen Al Omari, Marketing and Sales Director, NESR, on ADIPEC as a platform for sharing industry break-throughs and the success stories they bring

Tell us about your company.

NESR was formed in 2017 as a Special Purpose Acquisition Company (SPAC). The SPAC was a vehicle to list an oilfield services company from the MENA region in NASDAQ. National Energy Services Reunited Corp. (NASDAQ: NESR) was officially born in June 2018, following the acquisition and merger of two leading companies: National Petroleum Services (NPS) and Gulf Energy Services SAOC. In June

2018, NESR became the first and only company from the MENA region to list on NASDAQ. Today, NESR is a leading oilfield services provider from the MENA region.

Where and what are your key markets?

NESR operates in 14 countries and employs more than 4000 people from more than 40 countries. Our biggest operations are in Saudi Arabia and Oman. We also have sizable operations in North Africa, and Iraq. We operate mainly in the MENA region however, we have smaller operations in Asia and Africa as well.

What are your aims at ADIPEC 2019? Are you attending to look for local partners/JVs/distributors?

Our main objective is to showcase new technologies, which bring value to our customers in the MENA region. NESR team and our technology partners' experts will be available to explain the value of the technologies either through one-on-one meetings or technical presentations. We also want to connect with customers in order to update them on NESR's progress and recent developments in activities and services.

Are you launching new products and/or services?

We will showcase innovative technologies including the K-BOS™, the industry's first and only Kinetic Blow out Stopper. In addition, we are showing inVision™ system, which allows safer and more efficient well interventions as well as advanced wireline perforating systems. Finally, we will be presenting some of our recent success stories and technical achievements.

What emergent technologies are helping transform the oil and gas industry from your perspective - and what innovations are you looking to bring to the industry?

In the current challenging commodity markets, lower cost per barrel is one of the main drivers for our customers. We try to identify those innovative technologies and solutions that are complementary to our portfolio of services (Drilling, Evaluation & Production) and that allow us to offer more efficient and cost-effective solutions to specific customer challenges.

KADDAS OILFIELD

SERVICES & TRADING COMPANY L.L.C.
